

RESEARCH & DEVELOPMENT CELL

SAI NATH UNIVERSITY

To promote and strengthen research culture in the University, an **R&D Cell** shall be constituted under the Chairmanship of the Vice-Chancellor.

The primary functions of the Cell will include identifying thrust areas of research, encouraging faculty and students to undertake innovative projects, facilitating sponsored research and consultancy, promoting publications in reputed journals, ensuring ethical standards in research, and supporting patent and IPR-related activities. Sub-committees may be formed for project funding, infrastructure, publication ethics, industry collaboration, and monitoring of research activities. The Cell will meet at least once every quarter to review progress and prepare an annual report on research and development activities for submission to the University authorities.

MESSAGE FROM DEAN (R&D)

It gives me immense pleasure to extend my greetings through the Research & Development Cell of Sai Nath University. In today's knowledge-driven society, research and innovation are the cornerstones of academic excellence and social progress. The University has established the R&D Cell with the vision of fostering a vibrant research culture among faculty and students, encouraging interdisciplinary collaboration, and linking our academic pursuits with the needs of industry and society.

Our aim is to create an environment that inspires curiosity, creativity, and critical thinking. The Cell will facilitate funded research projects, consultancy, quality publications, patents, and innovative practices, while ensuring the highest standards of ethics and integrity. We strongly believe that every idea, however small, has the potential to create meaningful impact when nurtured with dedication.

I invite all stakeholders—faculty members, research scholars, and students—to actively participate in the initiatives of the R&D Cell. Together, let us strengthen the reputation of Sai Nath University as a hub of innovation, knowledge creation, and societal contribution.

Dr. Ashok Kumar Singh

Dean, Research & Development

Sai Nath University
