Mission :

Sai Nath University will transform lives and serve society by creating knowledge, wisdom, educating and putting knowledge to work on a large scale and with excellence.

The University is committed to create a transformative educational experience for students focused on deep Inter- disciplinary knowledge, problem solving attitude, leadership ability, communication and interpersonal skills, personal health care and well-being.

Sai Nath University is to cultivate a dynamic community committed :

- To provide quality education for Jharkhand & less fortunate peoples of the region & for the nation.
- To provide a platform for the students for skill development to make them employable and or entrepreneur.
- To provide higher education & research.
- To interact with the society in a transformative way — regionally, nationally, and globally — by engaging with stakeholders outside the traditional borders of the university campus.

Vision :

To create a brilliant future, in which the students, faculty staff and all stake holders thrive and the citizens of Jharkhand, the Nation and the world benefit, a future in which Sai Nath University is recognized as leader among self-finance research universities in:

- Teaching, scholarship and service
- Higher education and research
- Science & Technology
- Health care
- Engagement and public service
- Economic growth of Region and Nation
- Arts, culture and literature
- Global reach
- Value excellence, quality and service
- Foster innovation and creativity

Thus, the overall vision of the University is to "Think Globally and Act Locally".

Earlier the name of Ranchi District was Lohardaga. The old district had come into existence after the creation of the non-regulation South - West frontier as a result of the Kol rising in 1831-32. The name of the district was changed in 1899 from Lohardaga to Ranchi after the name of a small village now comprised within the headquarters station.

In ancient times the tract which corresponds to the district of Ranchi and the neighouring parganas was in the undisturbed possession of Munda and Oraon Tribes and was known to Aryans as Jharkhand or the 'forest territory'. The entire tract was presumably beyond the pale of the direct Hindu influence in ancient India. However, Jarasandh, the mighty emperor of Rajgriha in the Mahabharat period might have exercised some kind of loose supervision over the area. Similarly, Magapadmand Agrasen of Magadh, who subdued the entire country upto Orissa, might have gained some control over Jharkhand as well.

Geography

Ranchi is located on the southern part of the Chota Nagpur plateau which forms the eastern edge of the Deccan plateau. Ranchi is referred to as the "City of Waterfalls", due to the presence of numerous large and small falls around the close vicinity of the city. The most popular ones are Dassam Falls, Hundru Falls, Jonha Falls, Hirni Falls and Panchghagh Falls. The Subarnarekha river and its tributaries constitute the local river system. Dams in Kanke, Rukka and Hatia have been built over these channels to cater to the water requirements of majority the population. Ranchi has a hilly topography and its combination with dense tropical forests ensures that it enjoys a comparatively moderate climate compared to the rest of the state. Previously, it was accorded a 'hill station' status during the British rule. Rapid population growth and industrialization have caused considerable change in the weather pattern and rise in average temperatures. This has resulted in gradual loss of this "Hill Station" like status.

Climate

Ranchi has a humid subtropical climate. However, due to its position and the forests around the city, it is known for its pleasant climate. Its climate is the primary reason why Ranchi was once the summer capital of the undivided State of Bihar. Temperature ranges from maximum 42 to 20 °C during summer, and from 25 to 0 °C during winter .December and January are the coolest months with temperature getting to freezing point in some places of the city. The annual rainfall is about 1430 mm (56.34 inches). From June to September the rainfall is about 1,100 mm.
